EDUCATION

Maharaja Agrasen Institute of Technology

B.TECH in Information Technology and Engineering

May 2026

CGPA: 9.05

The Air Force School

(Higher Secondary Education (XII))

June 2022

Percentage: 94.6

SKILLS

Languages: Java (Data Structures & Algorithms), Python, JavaScript, TypeScript

Frameworks & Technologies: Next.js, React.js, Node.js, Express.js, TensorFlow, PyTorch

Databases & Cloud: MongoDB, SQL, Supabase

Tools: Docker, Git, REST APIs

Core Competencies: Problem-Solving, Analytical Thinking, Team Collaboration, Continuous Learning

EXPERIENCE

AI/ML Research Intern | MAIT, New Delhi

November 2024 - January 2025

- Conducted research under a college professor on Brain Tumor Segmentation using UNET architecture. Developed a high-accuracy model achieving 98.87%, contributing to AI-based medical image segmentation for improved tumor detection. Currently authoring a research paper based on this work to detail findings and methodologies.

PROJECTS

Brain Tumor Segmentation using Neural Networks | *U-Net CNN, Encoder-Decoder Architecture* — [Notebook Link](#)

- Developed a U-Net based model using TensorFlow/Keras for Brain Tumor Segmentation from MRI scans, a critical medical imaging task.
- Optimized the network using the Dice Loss function, achieving a high Dice Coefficient of 0.89 to precisely localize tumor boundaries and enable automated medical analysis.

Deep Learning Terrain Classifier | *Python, Pytorch, CNN* — [Notebook Link](#)

- Engineered a Deep Learning Terrain Classifier using PyTorch and Transfer Learning (MobileNetV2, ResNet18) to autonomously identify four distinct ground types (sandy, rocky, grass, marshy).
- Achieved 96% classification accuracy on test data and performed Explainable AI (XAI) using Grad-CAM analysis to validate model feature importance and ensure deployment readiness.

ChefMate | *Reactjs, Nodejs, Expressjs, Tailwind CSS* — [Github Repo](#)

- Developed a full-stack MERN application with a responsive UI/UX using Tailwind CSS, enabling users to search and create recipes, integrated with Spotify API for background music and a built-in timer for cooking assistance.
- Implemented an interactive map feature for location-based recipe recommendations, optimizing user experience and enhancing engagement, contributing to the application's success in a hackathon.

ACHIEVEMENTS

LeanIn Hacks 6.0 | *Winner*

- Developed and presented Chefmate, a full-stack recipe application, securing the 1st place title in the final pitch event held at the Microsoft Office, Gurgaon.

Code Capella (TechSurge & Mridang'24) | *Winner*

- Achieved the 1st place title in a Front-End Website (UI/UX) Building Competition, demonstrating expertise in design and responsiveness.

ZS Campus Beats 2025 | *Among Top 125 Teams*

- Qualified Among the Top 125 Teams in ZS Associates' national-level consulting and technology case challenge, testing analytical and business problem-solving skills.

POSITION OF RESPONSIBILITY

IETE : Official society of Electrical Dept of MAIT | *Social Media & Graphics Lead*
