SUMMARY

Junior AI/ML & Data Analyst with hands-on experience in Python (pandas), SQL, and Excel. Built forecasting models (Random Forest) and automated reporting pipelines, and performed EDA and feature engineering to support business decisions. Currently a Business Analytics Intern at Cvent, working with large event datasets to build reproducible analytics workflows and surface actionable insights for stakeholders. Strong interest in applying ML to financial services use cases such as risk, marketing, and customer analytics.

EXPERIENCE

Cvent, Business Analytics Intern (Jun 2025–Present):

Event Analytics Automation

- **Objective:** Automate recurring event/program reporting and improve the reliability of weekly KPIs by reducing manual steps and data errors.
- **Tech / Stack:** Python, REST APIs, SQL (joins/aggregations), Excel/Power BI, data validation (nulls/outliers/dedup), structured logging/error handling.
- **Outcome / Learnings:** Built an end-to-end extract→validate→transform→publish pipeline, cutting manual reporting ~75% and speeding stakeholder updates. Also added automated QA/exception flags and standardized KPI definitions/docs for consistent, audit-friendly reporting.

AI Governance Tracker

- **Objective:** Build a simple governance tool to track AI use cases (model/data/tools/owners) and generate a practical risk score + required controls.
- **Tech / Stack:** Python, SQLite/Postgres, YAML/JSON control catalog, NIST AI RMF (Govern/Map/Measure/Manage) + control prioritization inspired by CIS Controls.
- **Outcome / Learnings:** Built a “model card/system card” style inventory: owner, purpose, data classification, access paths, and monitoring requirements.
- Generated standardized outputs: risk register, control checklist, and “go/no-go” review gates aligned to RMF lifecycle functions.

PROJECTS

Demand Forecasting Model (June– July 2023)

- Built a Random Forest model to predict item-level sales; achieved MAE 4.68, RMSE 6.25, MAPE 20.63%.
- Performed EDA and feature engineering in pandas, validated results via cross-validation, and translated outputs into stocking/assortment recommendations.
- Packaged code in a clean notebook with charts and a short readme for non-technical stakeholders.

Smart Transit App Development (January – April 2025)

- Extracted usage/booking data and produced summary analytics on ridership and booking funnel.
- Tested a face detection CNN model to display the number of people in buses for alert purposes, implemented as an independent module.
- Achieved a streamlined booking process, enabling efficient ride scheduling and user data management with a secure backend.

Museum Ticket Booking Chatbot (October – December 2024)

- Designed an AI-driven chatbot using Flask and JavaScript, integrating Razorpay for payments and QR code generation.
- Achieved 90% user satisfaction in beta testing by enabling seamless ticket booking and data extraction.

EDUCATION

Sharda University, Greater Noida

B.Tech. in Computer Science Engineering (Artificial Intelligence and Machine Learning)

2022 – 2026 | CGPA: 8.93/10 (Top 10% of class)

St. Mary's Senior Secondary School, Delhi

Intermediate (CBSE) | 2021–2022 | 81.8 percent

Matriculation (CBSE) | 2019–2020 | 93.6 percent

PROFESSIONAL SKILLS

- Data: SQL (MySQL), Excel (PivotTables, XLOOKUP, Power Query), Python (pandas, NumPy, matplotlib), EDA, stats (hypothesis testing, regression).
- BI/Reporting: Power BI.
- Machine Learning: Logistic Regression, Random Forest.
- Tools: Git.
- Soft Skills: Team Collaboration, Problem-Solving, Project Management

CERTIFICATION

- SQL (Basic + Intermediate), HackerRank, 2023
- Microsoft Copilot & AI: Productivity Tools, Data Analysis, and Prompt Engineering, 2023–2024
- Microsoft Azure: Secure AI Services, AI Solutions Development, Machine Learning Fundamentals, 2023–2024
- Problem Solving (Basic), HackerRank, 2023
- Fake Product Review Detection using Machine Learning, 11th International Zeugma Conference, 2024

AWARDS AND HONORS

- Won 3 Gold Medals in International Mathematics Olympiad among 500+ participants, 2019–2021.
- Gold Medallist in Zonal Athletics Meet and Silver Medallist in District Athletics, 2020.
