Education

Rajiv Gandhi Institute of Petroleum Technology

B.Tech in Electronics Engineering

Amethi, Uttar Pradesh

2023 – 2027

Sanskar Public School

CBSE Board – Class XII (79.6%)

Gwalior, Madhya Pradesh

2022

Air Force School

CBSE Board – Class X (82%)

Gwalior, Madhya Pradesh

2020

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, Database Design

Tools: Git, GitHub, Docker, AWS, DBeaver, Postman, VS Code

Core: Data Structures & Algorithms, Object-Oriented Programming, System Design, API Development

Experience

Teamarcs Technologies Private Limited

Noida, Uttar Pradesh

Software Engineer Intern

May 2026 – Jul 2026

- Contributed to **DayCare Management System**, a production-level enterprise application, working across the **React.js**, **NestJS**, **JavaScript**, and **PostgreSQL** stack while wiring up REST APIs and managing the database via DBeaver.
- Engineered and refined the **Admin Panel**, **Children Management**, **Staff Management**, **Waitlist Management**, sidebar navigation, and dashboard modules, delivering **CRUD functionality** across multiple features while preserving existing UI and architecture.
- Architected the **complete Leave Management module** end-to-end – Leave Allocation, Application, Summary, Balance tracking, History, and Analytics – unifying the frontend, backend, and database layers.
- Constructed **NestJS controllers, services, DTOs, and entities** alongside **PostgreSQL** schemas, relationships, and migrations, troubleshooting cross-stack issues through systematic debugging.

Bharat Electronics Limited (BEL)

Pune, Maharashtra

Embedded Systems Intern

May 2025 – Jul 2025

- Designed and tested a power adapter PCB for a **Laser Range Finder** deployed in Indian defense systems, reducing design iteration time by **20%**.
- Integrated **sensor fusion and control algorithms** for autonomous robotics navigation, improving system stability and reducing navigation error by **15%**.

Projects

HireLens – AI-Powered Recruitment Platform | *React.js, NestJS, PostgreSQL, JWT, Gemini API* [GitHub](#)

[Live Demo](#)

- Developed an AI-powered recruitment platform using **React.js**, **NestJS**, **PostgreSQL**, **JWT Authentication**, and **Gemini API**, supporting **100+ candidate profiles** with secure resume uploads, role-based access control, and personalized job discovery.
- Built a **resume parsing and job-matching engine** that analyzed **150+ resumes**, extracting key skills, education, and experience details to generate tailored career-page recommendations through **AI-powered processing and web search integration**.
- Engineered and optimized **20+ RESTful APIs** for authentication, resume management, feedback tracking, and HR communication, achieving **sub-300 ms average API response time** for core database operations and candidate search workflows.

AlgoSort – Sorting Algorithm Visualizer | *React.js, JavaScript, Tailwind CSS, GSAP* [GitHub](#)

[Live Demo](#)

- Created an interactive visualization platform for **Bubble Sort**, **Merge Sort**, and **Quick Sort** using React.js and GSAP-based step-by-step animations.
- Utilized **React hooks** for state management and added user controls including **speed adjustment (up to 98%)** and **4 configurable array sizes**; incorporated a built-in **help module** for FAQs.

Achievements & Leadership

- **Winner – Urjotsav (2024):** Built an autonomous maze-solving robot, outperforming **250+ teams**.
- **1st Runner-Up – Meshmerize, IIT Bombay TechFest (2024):** Secured a podium position among **2,000+ participants** in a national robotics competition.
- **Vice Secretary – IEEE Robotics and Automation Society (2025 – 2026):** Organized technical workshops for **100+ members** and supported collaboration with college robotics clubs.
- **Event Coordinator – Urjotsav Technical Fest (2023):** Coordinated technical events and execution for **200+ participants**.
